Problem

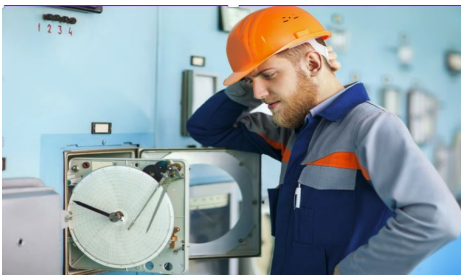

Fragmented Data

Employee spend 50% of time
navigating disparate systems

Disjointed Insights

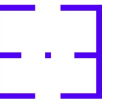

Mfg businesses loses over 20%
due to lack of meaningful Insights

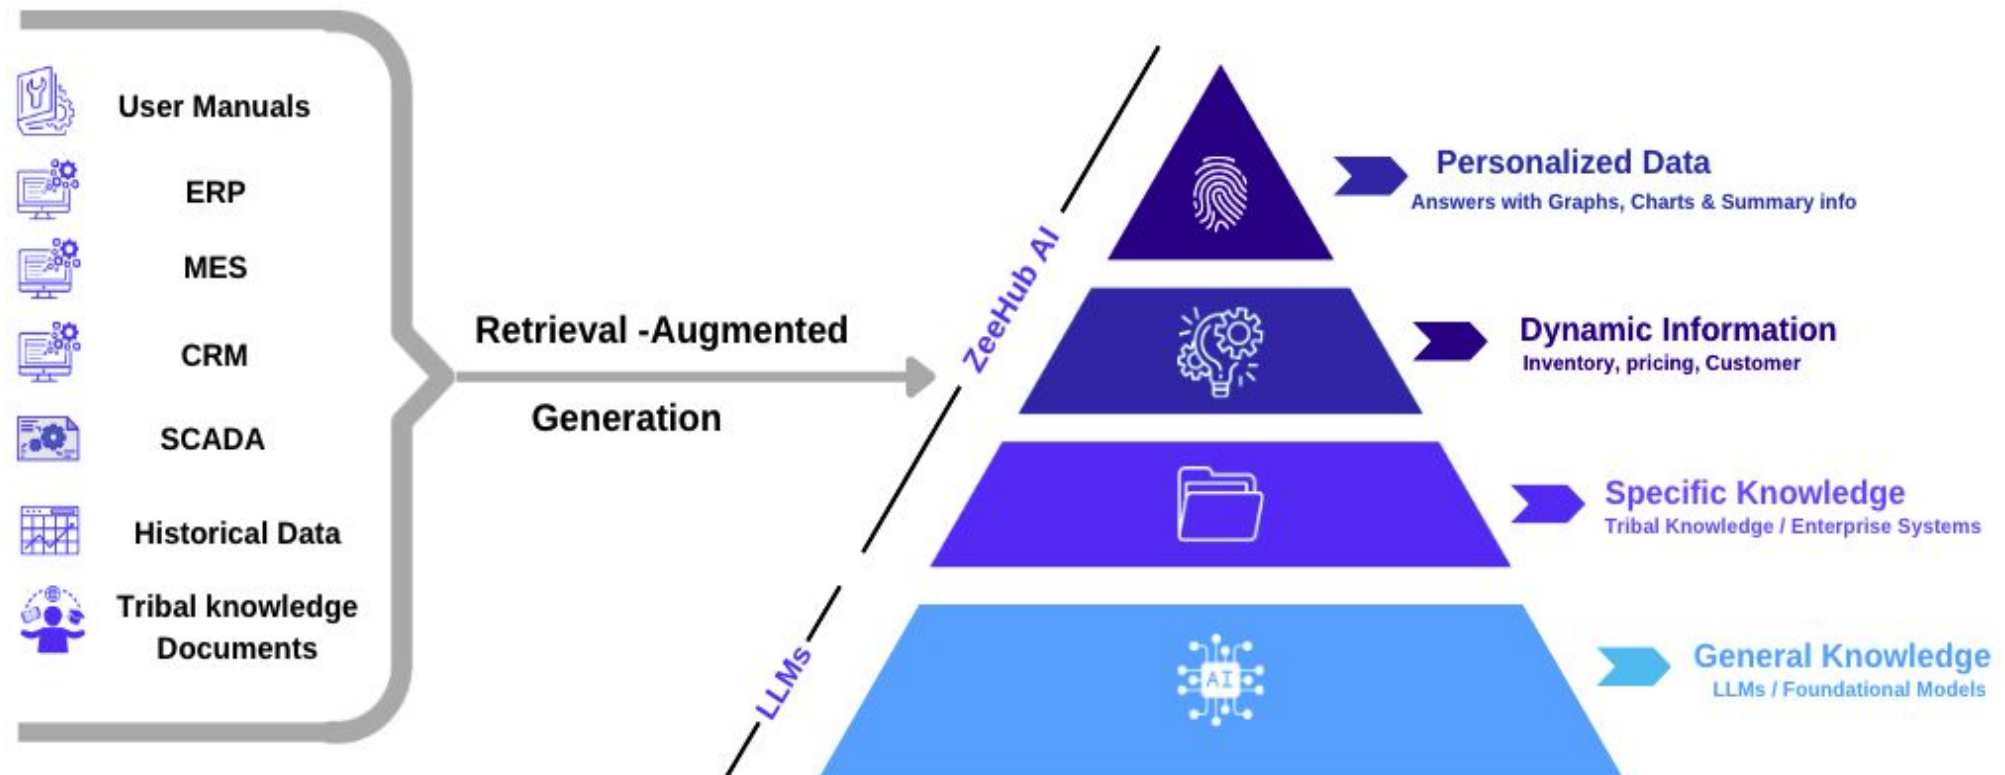

Skill Gaps & Churn

Over \$2T impact next 5-7 years
as a result of worker underutilization

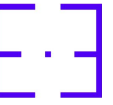

Solution

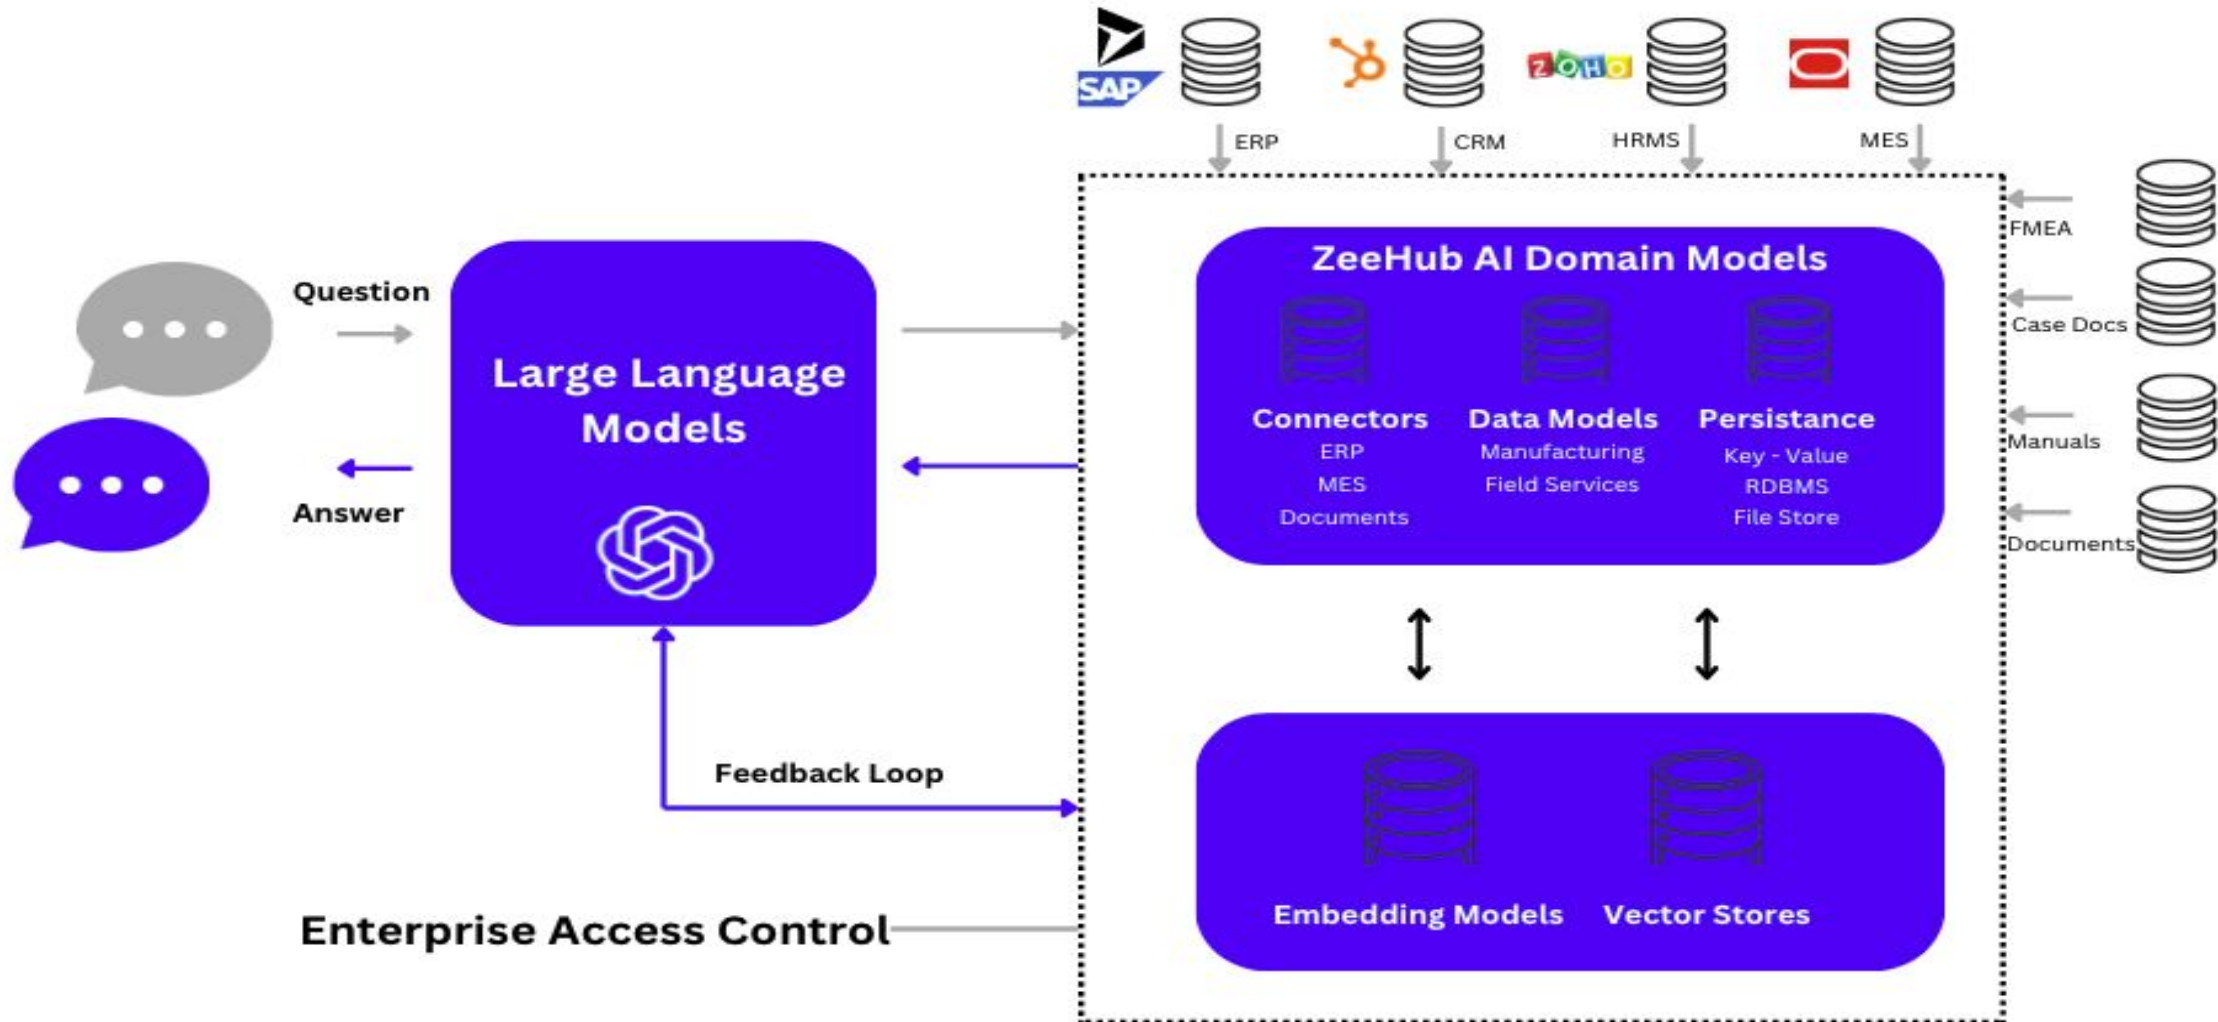

An AI-powered digital Data Scientist empowering executives, plant managers to uncover **personalized insights** from industrial data **using natural language**.

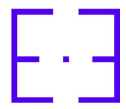

Architecture

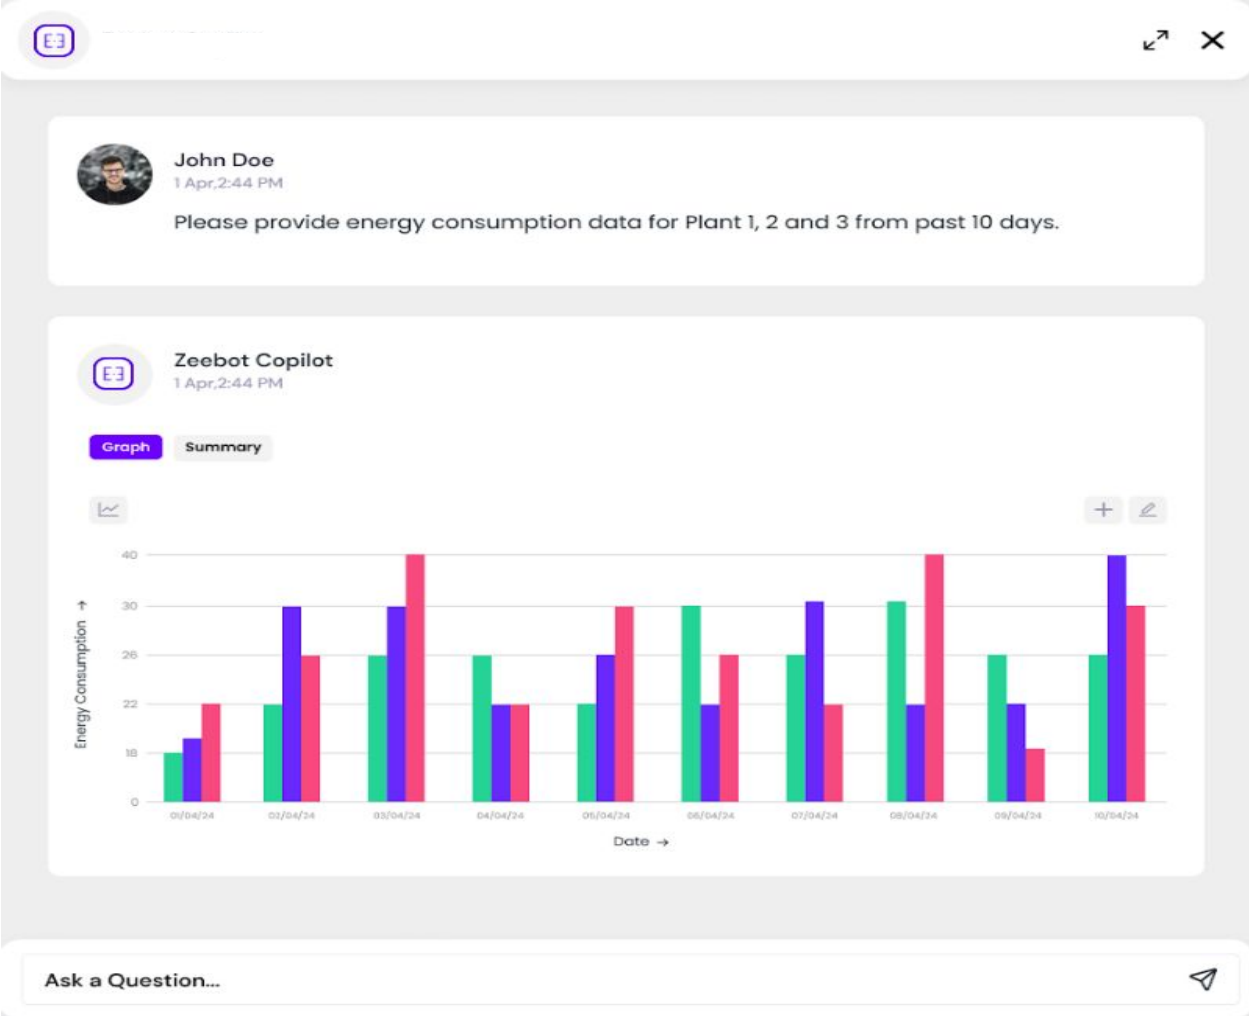

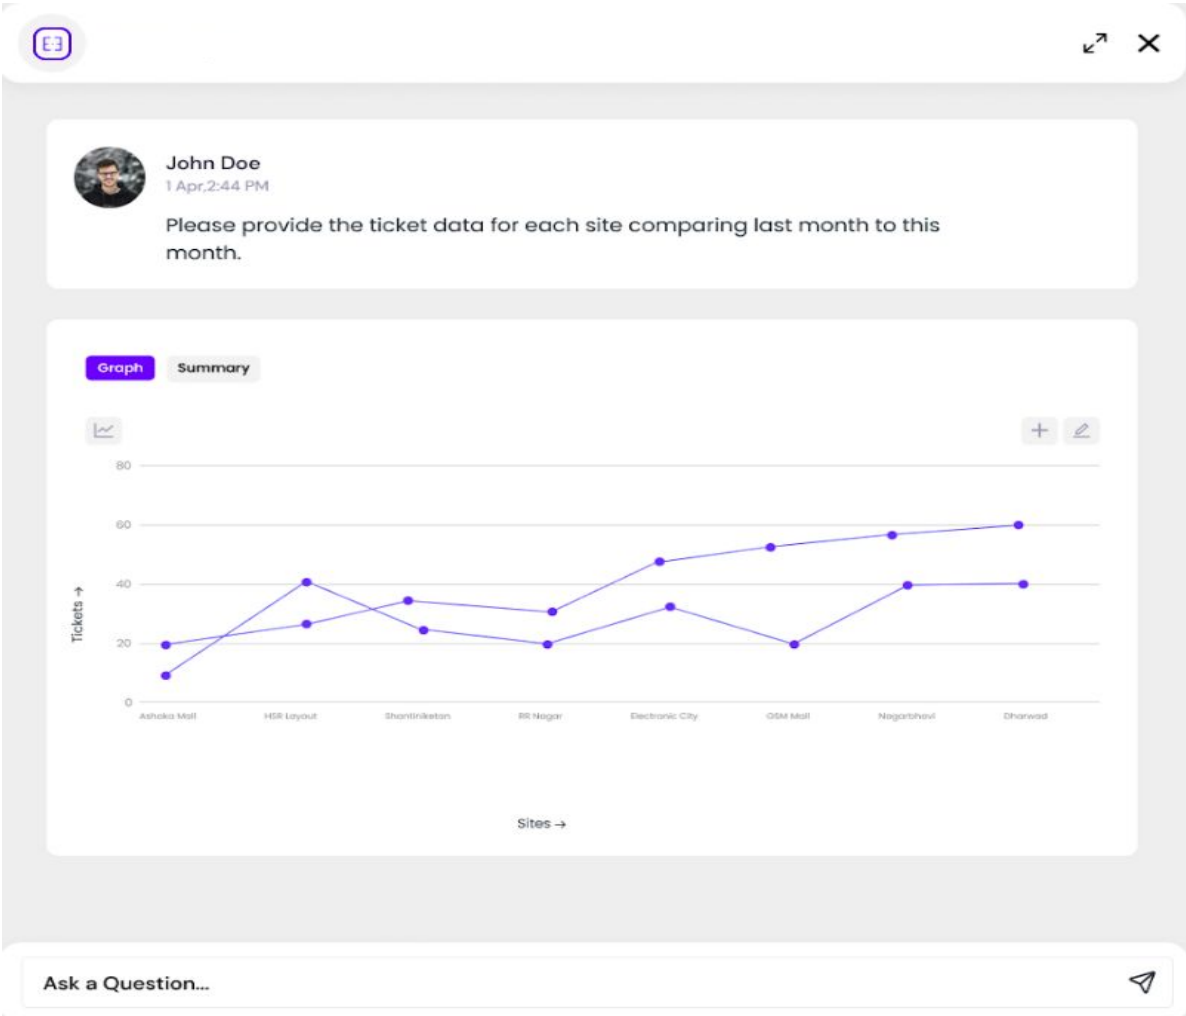

Continuous feedback loop to enhance contextual accuracy from the Foundational Model to the Zeehub AI Model.

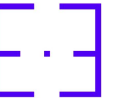

Product

Our AI assistant gathers and organizes data from diverse sources in real-time, delivering immediate answers in graphical or textual formats.

Market Size

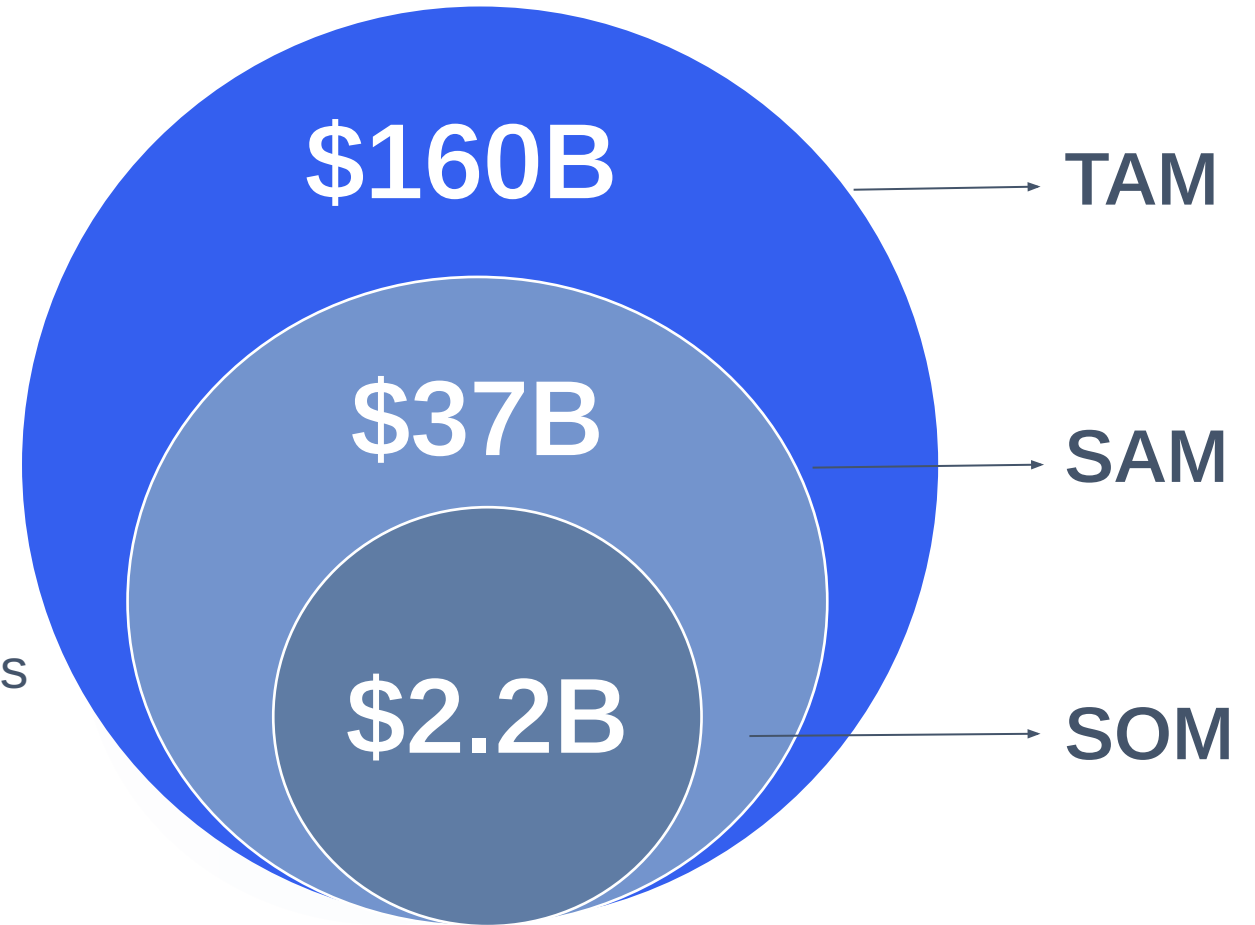

CAGR 20%

over next 4 years

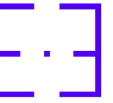

Global Opportunity -
Manufacturing & Field Services Businesses

Addressable Market -
Manufacturing verticals in the US
Company sizes from 100 to 2000 Employees

Obtainable Market & ICP -
Machine Builders and Component Manufacturers in the US
Company sizes from 100 to 2000 Employees

Go-To Market Plan

Value Proposition (What)

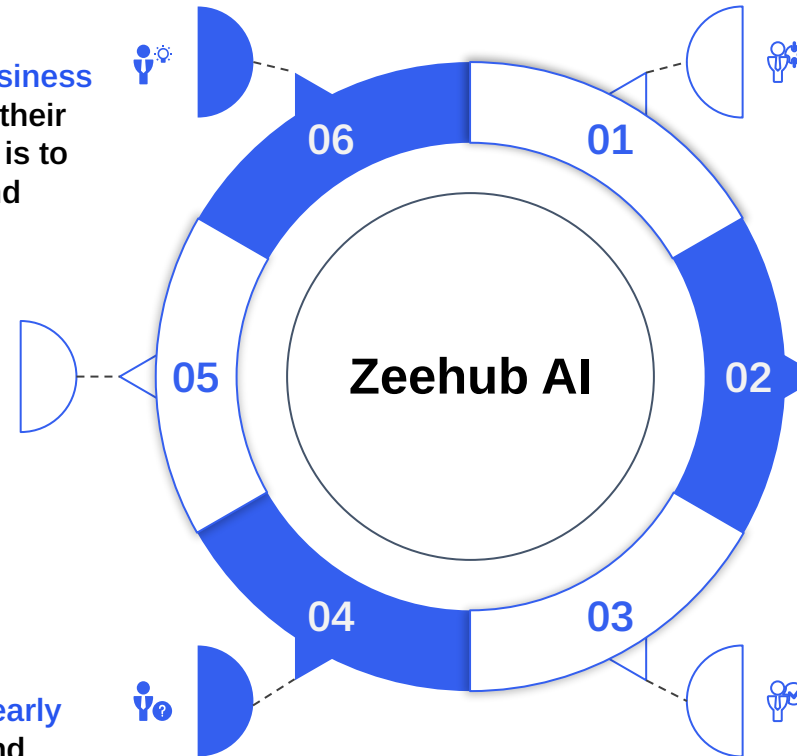

We provide **personalized insights** to **Executives, Business Heads of Operations, and Managers** by analyzing their fragmented data using natural language. Our goal is to enhance productivity, operational efficiency, and decision-making.

Distribution (Where)

ZeeHub will initially target machine builders & contract **manufacturing**.

Timeline (When)

Launched initial product, **targeting early adopters**. Scale up distribution and partnerships over the next year, aiming for widespread adoption

Customer (Who)

Targeting industrial businesses from **100 to 2000** employees..

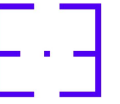

Competitive Advantages (Why)

- **Higher Accuracy** - LLM agnostic architecture
- **Domain Data Model**
- **For small-mid market customers** - Pricing

Acquisition Channels (How)

- Channel Partners
- Digital marketing
- Direct Sales
- Inbound Marketing

We are raising **\$1M** to support growth and product monetization

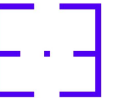

Use of Funds

- Product Dev & Strengthen IP
- Sales & Marketing
- Infrastructure

Expected Outcomes

- To reach ARR \$1.2M in the next 12 months
- Product expansion in other Geos
- Private Cloud Offering
